Senior DevOps / System Administrator

Opportunity

An exciting opportunity has arisen for a **Senior DevOps / System Administrator** to join the Axis12 team! We're looking for a talented and driven individual who will play a key role in delivering some of the best online projects for cultural institutions including Southbank Centre, Somerset House, British Film Institute, Tate, Kew Gardens and Royal Museums Greenwich.

You will work in an Agile project management environment, will be involved in multiple projects at any one time and will work closely with a talented team to deliver top products for some truly great institutions. Your role is to help define the technical approach and deliver valuable and inspiring websites / apps from concept to delivery.

The successful candidate will be a strong communicator, excellent multi-tasker, eager to solve problems and have strong technical skills. You will enjoy working in a team environment and thrive on varied and interesting challenges.

This is an exciting opportunity to work in an Agile environment with some truly amazing clients.

Key responsibilities

- Participating fully in day-to-day hosting and support operations, responding to client needs (25% of time)

- Working on client projects to deliver projects that will involve high availability, disaster recovery planning, multiple datacentres and a range of software technologies (50% of time)

- Planning for medium- and long-term delivery of services that will involve research, experimentation and writing code (25% of time)

- Managing your own time, working in an Agile environment, reporting to the Director of Operations and CTO

Security classification: Official   www.axistwelve.com

You'll have:

- A self-starter mentality with the ability to plan and prioritise workload

- Experience handling sensitive data and complying with security controls

- A strong appetite to understand how things work

- A desire to be proactive in suggesting ways to improve the product as much as possible

- No fear when it comes to fighting your case if you don't agree with the way things are being proposed/done

- A desire to work in a team in a collaborative and productive way

- Experience working in a high traffic volume web environment

- Skills in traditional LAMP stack, KVM, Git, LDAP, Docker or Kubernetes, AWS

- Experience with configuration management tools like Puppet and Ansible

- Confidence with monitoring tools like Nagios/Centreon

It would be nice if you had:

- MongoDB

- Apache Solr

- RabbitMQ

- MuleSoft

- Jenkins

- Varnish

- Drupal

- Exposure to Vagrant/VM machines

Security classification: Official   www.axistwelve.com

You'll receive:

- Flexible working environment including occasional remote working when required

- Flexible start – finish times

- The chance to work on both client facing projects and internal incubator products

- Private healthcare with Vitality

- Holiday allowance that increases with longevity

- Company contributions towards gym memberships

- Optional Pension Plan

- Regular staff outings and social events (we've gone to Ibiza for the last few years!)

- Cycle to work scheme

- In-house training and development opportunities

- Well supplied kitchen with coffee machine / refreshments

- Central London location
